

## Expedition Log of the S/V *Carlyn*

**Date:** September 25, 2011

**Trip Day:** 1

**Location:** Blake Island

**Name(s):** LaTia Glymph, Shannon Ferreira, and Tania Lemus

**School/Grade:** Washington High and Franklin Pierce High.

### Afternoon Report from *Carlyn* to the Web

**Please share some interesting stories about today...**

There was a lot of wind today and some of us didn't feel very well and we had to be extra safe. Some of us chose to eat a peanut butter and hot sauce sandwich, which wasn't such a good idea since we got a bit sea sick. When collecting data we had the chance to see shrimp in the zoo plankton samples.

**Any favorite wildlife sightings, quotes, games to share?**

We saw a seal, Seattle, and the Space Needle. We played a hand tap game, we played watermelon, and we played a brainteaser game.

**Describe the anchorage or moorage where *Carlyn* is right now:**

We are surrounded by rocks forming a break water, channel markers, and other boats. We are located by Vashon and Bainbridge Island. We have a beautiful view of the space needle, and of the Olympic mountain range. The camping sites for those who are camping on shore have bathrooms, large fields with geese, deer and raccoons. and a safe camping area near the water.

**Today's weather...**

Windy with squalls, and sun patches.

**Describe highlights from today's science and sailing watches:**

We found shrimp in our zoo plankton sample, we put up the Jib sail and the Mizzen sail, we tended dock lines, and some people steered *Carlyn*.

**Any questions, concerns, or expectations for tomorrow?**

What camping on shore will be like tomorrow night.
