

Expedition Log of the S/V *Carlyn*

Date: 10/23/11

Trip Day: day 1

Location: Eliot bay

Name(s): Brandon grobler

School/Grade: Lincoln high school, 9

Afternoon Report From *Carlyn* to the Web

Please share some interesting stories about today...

Today we all noticed that it takes a while to get somewhere by sail. We all learned what port and starboard.

Any favorite wildlife sightings, quotes, games to share?

We saw seals and played about 4 games. Also we herd very annoying seagulls.

Describe the anchorage or moorage where *Carlyn* is right now:

Housing and more boats. We also saw a curve at the end of the port .

Today's weather...

Cloudy with sun. also with some wind and very cold

Describe highlights from today's science and sailing watches:

Today we did two deployments; I was the chief and did phytoplankton. But sailing was more confusing. It was also 53 degrees in the water .

Any questions, concerns, or expectations for tomorrow?

I expect us to hopefully go camping for at least one night.
